

The listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A method for compiling electronic content relating to use of an on-line educational system, comprising:

providing on-line content concerning educational materials for particular educational courses offered by academic providers;

providing on-line an electronic syllabus for the educational course, the syllabus identifying units, assignments, and educational materials for the educational course;

identifying a particular user enrolled in at least one of the educational courses; and

electronically recording activity by the user relating to the user's enrollment in the educational courses for the duration of the user's enrollment;

receiving from a subscribing user a request for a subscription to the user's activity, including selectively receiving requests for a subscription to a library and a subscription to a particular type of content within the library, the library representing a compilation of the user's activity, the activity including multiple types of content relating to the user's enrollment in the educational courses;

verifying permission for the requested subscription, including verifying the requests for the subscription to the library and the subscription to the particular type of content in the library;

selectively granting the subscriptions based upon the verifying step, including selectively granting the subscription to the library and the subscription to the particular type of content in the library; and

transmitting an indication of the user's activity to the subscribing user according to the subscription to the library and the subscription to the particular type of content in the library, if at least one of the subscriptions is granted.

Claim 2 (original): The method of claim 1 wherein the recording step includes recording an identification of courses enrolled in by the user and content entered by the user relating to assignments for the enrolled courses.

Claim 3 (original): The method of claim 2 wherein the recording step includes recording an indication of grades given to the user for the enrolled courses.

Claim 4 (original): The method of claim 1 wherein the recording step includes recording an indication of on-line searches performed by the user.

Claim 5 (original): The method of claim 4 wherein the recording step includes recording for each of the searches an indication of a search query and an indication corresponding search results.

Claim 6 (original): The method of claim 5, further including permitting the user to access the recorded indications of the on-line searches.

Claim 7 (original): The method of claim 5 wherein the recording step includes specifying a network address of content as the indication of the corresponding search results.

Claim 8 (original): The method of claim 1, further including specifying permissions for access to the recorded activity.

Claims 9 and 10 (cancelled).

Claim 11 (currently amended): The method of claim 9 1, further including transmitting to the user an indication of the request for the subscription.

Claim 12 (currently amended): An apparatus for compiling electronic content relating to use of an on-line educational system, comprising:

a content module for providing on-line content concerning educational materials for particular educational courses offered by academic providers;

a syllabus module for providing on-line an electronic syllabus for the educational course, the syllabus identifying units, assignments, and educational materials for the educational course;

a user module for identifying a particular user enrolled in at least one of the educational courses; and

a record module for electronically recording activity by the user relating to the user's enrollment in the educational courses for the duration of the user's enrollment;

a subscription module for receiving from a subscribing user a request for a subscription to the user's activity, including selectively receiving requests for a subscription to a library and a subscription to a particular type of content within the library, the library representing a compilation of the user's activity, the activity including multiple types of content relating to the user's enrollment in the educational courses;

a verification module for verifying permission for the requested subscription, including verifying the requests for the subscription to the library and the subscription to the particular type of content in the library;

a module for selectively granting the subscriptions based upon the verifying, including selectively granting the subscription to the library and the subscription to the particular type of content in the library; and

a transmission module for transmitting an indication of the user's activity to the subscribing user according to the subscription to the library and the subscription to the particular type of content in the library, if at least one of the subscriptions is granted.

Claim 13 (original): The apparatus of claim 12 wherein the record module includes a module for recording an identification of courses enrolled in by the user and content entered by the user relating to assignments for the enrolled courses.

Claim 14 (original): The apparatus of claim 13 wherein the record module includes a module for recording an indication of grades given to the user for the enrolled courses.

Attorney Docket No. 42892.0300

Claim 15 (original): The apparatus of claim 12 wherein the record module includes a module for recording an indication of on-line searches performed by the user.

Claim 16 (original): The apparatus of claim 15 wherein the record module includes a module for recording for each of the searches an indication of a search query and an indication corresponding search results.

Claim 17 (original): The apparatus of claim 16, further including a module for permitting the user to access the recorded indications of the on-line searches.

Claim 18 (original): The apparatus of claim 15 wherein the record module includes a module for specifying a network address of content as the indication of the corresponding search results.

Claim 19 (original): The apparatus of claim 12, further including a module for specifying permissions for access to the recorded activity.

Claims 20 and 21 (cancelled).

Claim 22 (currently amended): The apparatus of claim ~~20~~ 12, further including a module for transmitting to the user an indication of the request for the subscription.
